G1 and G2 Species Habitat Management Guidelines

INTRODUCTION

The Sustainable Forestry Initiative® (SFI) [2022 Standards](#) include requirements that promote and conserve Forests with Exceptional Conservation Value (FECV), which includes critically imperiled (G1) and imperiled (G2) species. This fact sheet summarizes the analysis of FECV habitat within this ecoregion and provides habitat management recommendations that would benefit species potentially found here.

HABITAT TYPES

- Forested Wetland
- Hardwood Forest
- Mixed Conifer Forest
- Mixed Hardwood Forest
- Riparian/Stream/Special Site

FORESTED WETLAND MANAGEMENT

- Protect known locations of G1/G2 Species
- Buffer with a distance of at least 50 feet for known populations of the Quochita spiketail.

HARDWOOD/MIXED HARDWOOD FOREST MANAGEMENT

- Protect known locations of G1/G2 Species
- Retain large diameter trees, stumps and logs
- Avoid spraying for gypsy moth in areas with Frosted Elfin

MIXED CONIFER FOREST MANAGEMENT

- Protect known locations of G1/G2 Species
- Retain legacy trees, stumps, and logs
- Retain large diameter trees with cavities or broken tops
- Leave skips or thin to create gaps
- Retain large slash into piles
- Buffer rocky outcropping and scree areas
- Maintain violet for the Diana Fritillary

RIPARIAN/STREAM/SPECIAL SITE MANAGEMENT

- Protect known locations of G1/G2 Species
- Maintain well vegetated riparian buffers
- Retain large diameter trees near streams and rivers
- Buffer streams, wetlands, springs, and headwater areas
- Provide and protect the host plant (*Chasmanthium latifolium*) for the Linda's roadside skipper

All management recommendations assume that operators and land managers are following all applicable BMPs, laws, and regulations.
